Trevor Manuel
Minister of Finance

REDISTRIBUTION AND FISCAL POLICY
MAKING IN SOUTH AFRICA SINCE 1994:
A REPORT CARD

Keen students of the Minister's 2000 budget speech might have noticed that he referred to a recent study commissioned by the Department of Finance on the distributional impact of Budget expenditure between 1993 and 1997. The study focussed on the incidence of about 60% of government spending - through education, health, social grants, water provision and housing - and concluded that there had been a significant shift in social spending from the more affluent to the poor in South Africa since the democratic elections in 1994. The study noted that an estimated 57% of spending now went to the poorest 40% of the South African population and that the share going to the wealthiest 20% was under nine percent.

The Minister's presentation will expand on this element of the Budget process and should prove to be highly interesting.

Details to diarise:

Date: Wednesday 29 March 2000

Time: 3.30pm - 5pm

Venue: HSRC Conference Centre

Important: Please confirm your attendance
(to allow for a decision about the size of the
venue at the conference facility) to Richard
Humphries at RHumphries@hsrc.ac.za

Note that secure parking is available in the
