# **1. Background to the study**

## **1.1. Introduction**

The objective of this study is to give an overview of public perceptions on various aspects of nuclear technology and energy in South Africa, with the aim of providing a more detailed understanding of both the extent and nature of knowledge and attitudes towards this scientific subject matter.

The empirical results contained in the report are structured around the following thematic issues:

- Knowledge of Nuclear Technology
- Perceived Benefits and Concerns Associated with Nuclear Technology
- Support for Different Applications of Nuclear Technology
- Perceptions of Nuclear Energy
- Perceptions of Nuclear Safety
- Views on Nuclear Energy in a Global Context
- Information on Nuclear Energy
- Final Assessment of Nuclear Energy and Technology

## **1.2. Research Universe**

The target population for the survey is South Africans aged 16 and over. Specifically, the target population comprised people living in households, hostels and other structures. People living in special institutions such as hospitals and prisons were excluded from the sample. The inclusion of people from these institutions would have compromised the random selection procedure. Also, past experience has shown that access to people in these institutions is extremely difficult, since obtaining permission can be cumbersome and complex.

## **1.3. Sample Design**

The survey has been designed to yield a representative sample of adults aged 16 and older. The sampling frame used for the survey is based on the 2011 census and a set of small area layers (SALs). Estimates of the population numbers for various categories of the census variables were obtained per SAL. In this sampling frame special institutions (such as hospitals, military camps, old age homes, schools and university hostels) as well as recreational areas, industrial areas and vacant SALs were excluded prior to the drawing of the sample.

In the sampling, small area layers (SALs) were used as primary sampling units (PSUs) and the estimated number of dwelling units (taken as visiting points) in the SALs as secondary sampling units. In the first sampling stage PSUs (SALs) were drawn with probability proportional to size, using the estimated number of dwelling units (DUs) in an SAL (PSU) as measure of size (MOS). The DU as secondary sampling unit has been defined as "separate (non-vacant)

residential stands, addresses, structures, flats, homesteads, etc.” In the second sampling stage a predetermined number of individual dwelling units (or visiting points) were drawn with equal probability in each of the drawn DUs. Finally, in the third sampling stage a person was drawn with equal probability from all 16 year and older persons in the drawn DU.

Three explicit stratification variables were used in the sampling, namely province, geographic type and majority population group. Within each stratum, the allocated number of PSUs (which could differ between different strata) was drawn using proportional to size probability sampling with the estimated number of dwelling units in the PSU as measure of size (MOS). In each of these drawn PSUs, 7 dwelling units were drawn.

## **1.4. Data Weighting**

A total of 2 739 people were interviewed during this study. The final data set was given to the statistician for benchmarking and weighting purposes. When weighted, this number represents 36 493 490 South Africans of 16 years and older. The data was weighted to the 2011 census population estimates.

	Total	2700	100.0

Multiple response table		Cell %	N
48. What do you believe are, if any, the disadvantages of nuclear energy as a source of electricity?	The long term disposal of nuclear waste	13.9	481
	Risk of accidents	29.3	871
	Risk of radiation or contamination	18.6	571
	General impact on the environment	15.3	445
	Cost is too high	13.5	351
	Nuclear power stations are ugly to look at	2.9	83
	Other (Specify)	.8	20
	None (there are no disadvantages to nuclear energy)	5.0	122
	(Do not know)	46.4	1183

Multiple response table		Cell %	N
49. What do you believe are, if any, the disadvantages of nuclear energy as a source of electricity?	Nuclear energy is not more expensive than other fuels (costs are competitive)	10.0	278
	Helps to combat climate change	13.4	365
	It ensures a reliable supply of electricity	19.6	586
	It is a cleaner source of energy with less impact on the environment	8.8	245
	Only a small amount of waste is produced	6.3	169
	It is a proven technology that already exists	11.9	328
	It uses less fossil fuels or natural resources	5.0	176
	It offers an unlimited supply of power	10.8	373
	Other (Specify)	.7	17
	None (there are no benefits to nuclear energy)	10.0	230
	(Do not know)	49.0	1303

53. Coal and gas are worse for the environment than nuclear power	Strongly agree	248	8.1
	Agree	634	23.0
	Neither agree nor disagree	375	14.0
	Disagree	220	7.5
	Strongly disagree	74	2.6
	(Do not know)	1159	44.9
	Total	2710	100.0
54. In your opinion, should the current level of nuclear energy be reduced, maintained the same, or be increased?	Reduced	361	13.9
	Maintained the same	723	26.4
	Increased	397	12.7
	(Do not know)	1228	47.1
	Total	2709	100.0

## 2.5. Perceptions of Nuclear Safety

		N	Col %
55. To what extent do you think nuclear plants in South Africa represent a risk to you and your family?	A big risk	314	11.7
	Some risk	618	21.4
	Not much of a risk	393	14.7
	No risk at all	189	6.1
	(Do not know)	1202	46.1

## **NUCLEAR ENERGY / TECHNOLOGY**

**I am now going to ask you some questions about nuclear energy and technology.**

- 1. Overall, would you say you are very knowledgeable, somewhat knowledgeable, not very knowledgeable or not at all knowledgeable about nuclear energy and nuclear technology issues?**

Very knowledgeable	1
Somewhat knowledgeable	2
Not very knowledgeable	3
Not at all knowledgeable	4
(Do not know)	8

**The next few questions are like a quiz. The questions are not designed to trick you, so if you think you have the right answer, you probably do. If you don't know the answer, just say so.**

**Are the following statements true or false?**

	True	False	(Do not know)
2. South Africa has a nuclear power station in the Western Cape	1	2	8
3. South Africa has never built nuclear weapons	1	2	8
4. South Africa has a nuclear research centre in Gauteng	1	2	8

- 5. What benefits, if any, do you associate with nuclear technology? [RECORD ALL MENTIONS.]**

**FIELDWORKER: READ OUT OPTIONS.**

Medical diagnostics/research	01
Less harmful to the environment than other energy sources	02
Cost-efficient alternative	03
Energy production efficiency	04
Plentiful/renewable	05
It is a non-fossil fuel	06
It is a safe technology/energy source	07
Creates jobs/helps economy	08
Advanced technology/research	09
Produces power/electricity/energy	10
Other	11
None/no benefits	12
DK/NA	98

**6. What concerns, if any, do you associate with nuclear technology? [RECORD ALL MENTIONS.]**

**FIELDWORKER: READ OUT OPTIONS.**

The effects of radiation exposure/effects of a nuclear accident on workers and the community	01
The safety of nuclear power plants	02
The disposal of nuclear waste	03
The environmental effects of producing nuclear electricity	04
Terrorist access to nuclear weapons	05
Lack of knowledge of implications	06
Weapons/warfare	07
Misuse/abuse of nuclear technology	08
The cost of nuclear-generated electricity	09
Dangerous/frightening	10
Lack of controls/regulations	11
Incompetence/ improperly managed	12
Overall negative/against it	13
Other	14
None/no concerns	15
DK/NA	98

**To what extent do you agree or disagree with the following statements? Nuclear technology should be used ....**

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree	(Do not know)
7. ...in hospitals and clinics	1	2	3	4	5	8
8. ...to generate electricity	1	2	3	4	5	8
9. ...in industry and big business, i.e. to fix leaks in gas pipelines	1	2	3	4	5	8
10. ...for military applications, i.e. nuclear weapons	1	2	3	4	5	8
11. ...for cancer treatment	1	2	3	4	5	8

**12. How favourable or unfavourable is your overall opinion of nuclear energy?**

Very favourable	1
Mainly favourable	2
Neither favourable nor unfavourable	3
Mainly unfavourable	4
Very unfavourable	5
(Do not know)	8

**13. What do you believe are, if any, the disadvantages of nuclear energy as a source of electricity? [Showcard X]**

The long term disposal of nuclear waste	01
Risk of accidents	02
Risk of radiation or contamination	03
General impact on the environment	04
Cost is too high	05
Nuclear power stations are ugly to look at	06
Other (specify)	07
None (there are no disadvantages to nuclear energy)	08

**14. What do you believe are, if any, the benefits of nuclear energy as a source of electricity?**

Nuclear energy is not more expensive than other fuels (costs are competitive)	01
Helps to combat climate change	02
It ensures a reliable supply of electricity	03
It is a cleaner source of energy with less impact on the environment	04
Only a small amount of waste is produced	05
It is a proven technology that already exists	06
It uses less fossil fuels or natural resources	07
It offers an unlimited supply of power	08
Other (specify)	09
None (there are no benefits to nuclear energy)	10
